7. PROPERTY LOCATION _____
 N S E W Side of _____ St.
 _____ Rd. _____ Feet
 _____ Ave.
8. ORIGINAL CERTIFICATE OF OCCUPANCY # _____
 Certified as: _____ Date: _____

ARTICLE X — SECTION 1003 CERTIFICATE OF OCCUPANCY.

1. New Building No Building hereafter erected, enlarged, extended or altered shall be occupied or used, in whole or in part until a certificate of occupancy, certifying that such building conforms to the approved plans and the requirements of this code and stating the purpose for which the building may be used in its several parts, and any special stipulations, shall have been issued by the Building Inspector and signed by him or his authorized assistant. If the occupancy or use of a building is not discontinued during the work of alteration, the occupancy or use of the building shall not continue for more than thirty days after the completion of the alteration unless a certificate shall have been issued.

2. Change of Occupancy.

(a) No change or use shall be made in a building hereafter erected or altered that is not consistent with the last issued certificate of occupancy, for such building unless a permit is secured. In case of an existing building, no change of occupancy that would bring it under some special provision of this ordinance shall be made unless the Building Inspector, upon inspection, finds out that such building conforms substantially to the provisions of this ordinance with respect to the proposed new occupancy and use, and issues a certificate of occupancy therefor.

(b) The reestablishment in a building, after a change of occupancy has been made, of a prior use that would not have been permitted in a new building of the same type of construction is prohibited. The change from a specifically prohibited use to another specifically prohibited use shall not be made.

I swear that this application is a true and complete statement of all proposed work on the described premises.

**VILLAGE OF BABYLON
SINGLE FAMILY AGREEMENT IN LIEU OF AN EROSION AND SEDIMENT CONTROL PLAN**

Landowner's Name: _____
Address: _____

Phone: _____
SCTM# _____
Date of Application _____
Building Permit No: _____

In lieu of an erosion and sediment control plan for the construction of a single family home; I agree to implement any reasonable requirements necessary as determined by the Village of Babylon necessary to prevent the erosion and sediment loss from this project.

Furthermore, I shall adhere to the Code of the Village of Babylon in reference to the requirements of Chapter 305 Stormwater Management and Erosion and Sediment Control that represent the minimum practices necessary to prevent the erosion and sediment loss from this project.

I also grant the right of entry onto this property, as described above, to the Village of Babylon for the purpose of inspecting and monitoring for conformance with the requirements of Chapter 305 Stormwater Management and Erosion and Sediment Control.

I understand that failure to comply with the requirements of Chapter 305 Stormwater Management and Erosion and Sediment Control could result in violations being issued by the Village of Babylon.

I agree to the following controls on the construction site:

No earth, fill or construction material shall be allowed to migrate off site from this project on to the Village roadway and or storm drain system or an adjacent property. In the event any material inadvertently migrates off site it shall be immediately swept by broom or street sweeper. At the end of each workday the adjacent roadway and or storm drain system shall be self inspected for material. Litter shall be picked up on a daily basis from the site or any material that has migrated off site to adjacent properties and or the road system.

A portable toilet shall be provided on site during the construction period.

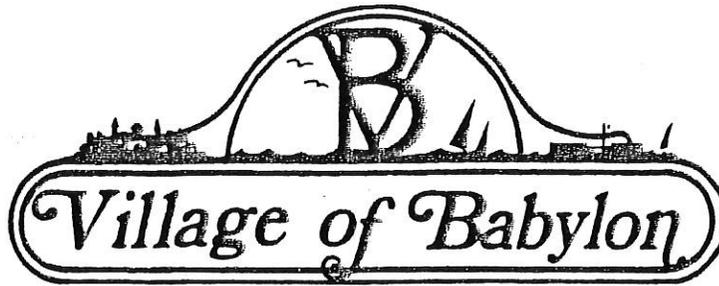

A temporary construction entrance shall be constructed utilizing recycled concrete aggregate or a similar material unless a suitable constructed entrance already exists on the site.

On areas of steep slopes or high erosion hazard suitable stabilization methods shall be employed such as silt fence or hay bales to prevent erosion and sediment loss.

§ 199-26 Storm drainage.

Roofs and paved areas, including yards and courts, shall be drained. Storm drainage shall be conveyed to an adequate and approved system of stormwater disposal and shall not collect on the ground or flow upon property of an adjoining owner, sidewalk or other public place.

PLANNING BOARD DRIVEWAY IMPLEMENTATION GUIDELINES

- Basic intent is to minimize stormwater run-off from the driveway areas into the street. For modifications to existing driveways, intent is to limit the run-off as not to exceed the current amounts.
- All new driveways **will require** additional on-site drainage (i.e. drywell, strip drains, etc.).
- Proposals to widen or lengthen an existing paved driveway and / or expand the width of the curb cut **will require** additional on-site drainage. Proposed paving of an existing gravel / dirt driveway **will require** on-site drainage. In the case of a partially widened or lengthened driveway where the curb cut remains the same, the need for additional drainage will be at the discretion of the Building Inspector.
- Additional on-site drainage **will not be required** if the proposed driveway covers the exact same paved area / configuration as the existing. Existing paved areas would include asphalt, concrete, pavers, etc.
- Driveway applications which require an on-site drainage plan must first be reviewed / approved by the Building Inspector prior to submittal to the Planning Board.
